To Whom It May Concern:

Subject: Reference Letter Rick Cuthbert, SDS

In August of 2001, then in my capacity of Recreation Facility Supervisor with the Corporation of the City of Hamilton, Rick Cuthbert's company - Triple R Coatings was contracted to install 10,000 square feet of vapour emission remedial system at the Chedoke Twin Pad Arena.

The Chedoke Twin Pad Arena was experiencing extreme bubbling in the rubber skate flooring tiles in the entire lower level of the facility. After taking vapour emission level readings by an independent contractor, we experienced vapour emission levels above 20 pounds on the lower concrete floor.

At that time and through intense research to rectify this moisture problem, the only product to provide a suitable solution and provide a valid warranty to correct this type of moisture problem was the Sinak Corporation Ltd - Vectra-3 Extreme Vapour Emission Remedial System that was supplied and installed by Triple R Coatings under the direction of Rick Cuthbert.

The work was completed on time, on budget, and to my satisfaction. Upon completion of the work, and through an independent contractor, moisture levels were reduced to 1.6 pounds. To this date, there has not been another concrete moisture problem at the Chedoke Twin Pad Arena.

Given my positive experiences, I would highly recommend the Sinak Vectra-3 Extreme Vapour Emission Remedial System and the installation expertise of this product by Rick Cuthbert and his present company SDS Coatings

Sincerely,

Edward M. Pavao
